Liver Support is the perfect tool to help detox and minimize the damaging effects of everyday pollutants

Hoffman Estates, IL (PRNEWswire) July 14, 2016 – The liver is the body’s largest internal organ, helping to remove toxins and harmful substances.

Since it can be difficult to detect how well a liver is functioning until it’s too late, it’s a good idea to support it with nutrients that provide healthy liver function support.*

Liver Support, a formula produced by Dr. Joseph Mercola, founder of Mercola, contains three important ingredients—N-Acetyl L-Cysteine (NAC), milk thistle and organic broccoli sprouts--

that strengthen different areas of liver function.

NAC restores glutathione supplies and supports mitochondrial function, while milk thistle helps repair damaged liver cells. Organic broccoli sprouts have a rich supply of sulforaphane precursor to support rapid excretion of environmental pollutants.*

“To help protect your liver, I recommend restricting alcohol consumption, avoiding the use of acetaminophen, maintaining your ideal body weight and restricting your intake of fructose,” said Dr. Mercola. “But an easy way to support your liver along with healthy lifestyle choices is to take a high-quality formula that contains the right combination of ingredients.”

With summer celebrations and upcoming holidays sure to introduce added toxins, it’s a good time to support one of the most important organs in the body with Liver Support. lth e-Newsletter.
