NET WT. 4 OZ. (113.3 g)

WHY BIODYNAMIC®?

Biodynamic® agriculture goes beyond Organic Standards by using holistic, regenerative farming practices to promote the health of the soil, crops and livestock. Biodynamic® farmers strive to create a diverse and balanced ecosystem within their farm to enhance the nutrition and quality of the food being grown with a heavy focus on sustainability.

solspring™

biodynamic organic
imperial green

traditional green loose leaf tea

Solspring Biodynamic Organic Imperial Green Tea is grown and harvested within the Darjeeling district, in small Putharjhora tea gardens situated on the Southern end of the foothills of the Himalayan Mountains in India. These small, third generation family owned tea gardens are over 100 years old, and women are placed in leadership roles within the gardens to create a culture of empowerment.

Imperial Green Tea naturally contains caffeine and offers a light and crisp flavor.

How to brew a great cup of Solspring Biodynamic Organic Imperial Green Tea:

- Place two (2) teaspoons (3 g) of tea into a tea infuser and place infuser over rim of mug.
- Pour not quite boiling water over tea leaves to fully saturate and fill up mug.
- Steep for 4 to 5 minutes, carefully remove tea infuser, and enjoy. Green tea can go bitter if steeped too long so infuser should be removed promptly once desired flavor is reached.

INGREDIENTS: Biodynamic Organic Green Tea Leaf.
