Revitalize. Refresh. Invigorate. Purify.

Bring the benefits of essential oils to your living space, with Dr. Mercola's Dry Aroma Diffuser. Perfect for use with organic essential oils, this waterless diffuser creates a pure aroma without the need to add water, to calm your environment and stimulate your senses.

Dr. Mercola's Dry Aroma Diffuser uses a pressurized high speed air stream and a specially adapted atomizing nozzle to break down essential oils into micron sized droplets, diffusing them at a highly accelerated rate of evaporation. In the Dry Aroma Diffuser, the essential oils only come in contact with glass, and no heat is used - so the pure qualities of the oils are preserved.

The base is hand-crafted from beech wood, and is topped with an elegant hand-blown glass reservoir. The essential oil reservoir easily disconnects from the base, allowing the reservoir to be filled and cleaned. The easy-to-use control knob is convenient when using stronger scents, aromatherapy treatments, or even when drifting off to sleep. The diffuser automatically cycles on and off to evenly distribute the aroma in a room, and features a silent motor for a peaceful, soothing experience.

The Dry Aroma Diffuser will provide countless hours of relaxation and rejuvenation, as you enjoy the benefits of organic essential oils.

Diffuser Dimensions: 4.5" x 4.5" x 4.5"
(115mm x 115mm x 115mm)
