DR. MERCOLA®

FLEA AND TICK DEFENSE

A Repellent to Help Protect
your Pet from Fleas, Ticks,
Mosquitoes, and Flies

NET CONTENTS 8 FL. OZ. (237 mL)

DIRECTIONS FOR USE: SHAKE WELL BEFORE EACH USE. Please read all directions carefully before application. Spray generously on pet, including legs and stomach. Work into the coat. Depending on your pet, spray may require additional rubbing to get product through their entire coat. Avoid contact with mucous membranes by covering your pet's nose, mouth, and eyes when applying near your pet's head. To apply product to your pet's head, spray solution onto a paper towel and wipe your pet's neck, ears, and face, carefully avoiding eyes and nose. Reapply as needed before your pet goes outside. Reapply whenever pet gets thoroughly wet. Safe for daily use if desired. Avoid soaking your pet with the spray. Keep cap on bottle when not in use. This spray can also be used on pet's bedding and grooming tools. This formula is designed to be non-staining, but we recommend testing it on fabric or other surfaces before use.

FOR USE ON DOGS AND CATS ONLY

CAUTION: KEEP OUT OF REACH OF CHILDREN. May cause allergic skin reaction. If product gets onto skin, wash with plenty of water and mild soap. If product gets into an eye, hold eye open and gently flush with water for several minutes. If wearing contacts, remove the contact after 5 minutes of flushing, then continue to rinse.

KEEP OUT OF REACH OF PETS. Not for aquatic use. Avoid inhalation and contact with eyes, nose, and mouth. Sensitivities can occur after using any flea or tick prevention program. If your pet shows signs of irritation, rinse them thoroughly, bathe your pet with mild soap and rinse again. If signs continue, consult a veterinarian immediately.
