Whole Home  
Air Purifier

Unlike filters that only affect air that passes through them, the ClearAir Whole Home Air Purifier delivers powerful purification to the sources of pollution inside your home, both in the air and on surfaces, covering up to 3000 square feet of open living space. Replicating the way Nature keeps the air clean in Earth's forests and mountains, your stale indoor air is transformed into fresh, healthy air for you and your family to breathe. Enjoy the smell of freshness without using expensive and toxic fragrances.

## Controls Mold, Mildew, Bacteria, Viruses, & Odors

Utilizing four proven air purification technologies, the ClearAir Whole Home Air Purifier controls all types of germs and fungi as well as eliminates odors of all kinds, including those that result from pets, cooking, or smoking.

## Controls Allergens in Your Breathing Space

Your home should be a refuge from all that worries you, allergens included. The ionic power of the ClearAir Whole Home Air Purifier causes allergens to clump together, until they are heavy enough to fall out of the breathing space to be swept up or caught in your HVAC filter.

Air Purifier

## Photocatalytic Oxidation

The PCO technology in the ClearAir Whole Home Air Purifier not only controls biological contaminants caught inside the device, it also produces a purifying plasma through molecular disassociation. This allows for the breakdown of odors, volatile organic compounds (VOCs), mold, bacteria, and viruses. The process leaves behind trace carbon dioxide and water vapor.

## Activated Oxygen

Activated oxygen, or ozone, is a naturally occurring oxidizer found everywhere outdoors, with higher levels after thunderstorms. It breaks down chemicals and microbials, and is especially proficient at eliminating offensive odors. The ClearAir Whole Home Air Purifier's oxidation generator is completely scalable and, when properly adjusted to the area being purified, generates a safe and effective level of ozone.

## Ionization

Needlepoint and pulse wave ionization creates a continuous level of ions in the living space being treated. This technology causes particles in the air to become attracted to each other like magnets. As particles clump together, they become too heavy to remain suspended in the air and fall to the floor to be swept up or caught in your filtration system.

## Electro-Static Filtration

An advanced electro-static filter is included with the ClearAir Whole Home Air Purifier to help keep the unit clean, and filter out particles clumped together through ionization. Unlike expensive HEPA filters, the electro-static filter is washable and can be used for the lifetime of the ClearAir Whole Home Air Purifier.

### Specifications

Voltage.....100 - 240VAC, 50/60 Hz  
Power Usage.....38 Watts (Normal) / 50 Watts (High/Away)  
Dimensions.....12" H x 9" W x 12" D  
Weight.....10.2 lbs.  
Effective Area.....250 sq. ft. to 3000 sq. ft.
